

GREENKEEPER'S REPORT 2022

As we all know last summer was very hot, with very little rain, which made keeping the green playable very difficult. But we got through and I think that our green was the best of all.

To date the green has had a winter feed and has been treated with sulphate of iron, top-dressed , seeded and spiked.

The mowers have been sent for service and should be back within two weeks.

I would like to thank all of those who helped with the green last season and hope I can rely on your support next season.

David Stover, Greenkeeper
